

NHS England – Yorkshire and the Humber  
Floor 6, Quarry House  
Leeds  
LS2 7PD

January 2023

Dear Colleague,

NHS England (Yorkshire and the Humber) commissions Diabetic Eye Screening Services in West Yorkshire. The current contracts for these services are due to expire on 31 March 2023. Following a successful procurement exercise, we can now confirm that the new service provider who will run the Diabetic Eye Screening programmes across West Yorkshire for the next 3 years will be InHealth Intelligence Ltd.

InHealth Intelligence Ltd are an independent sector provider with extensive experience of providing high quality screening services, and currently provide these in eleven regions. They have plans in place to ensure the service is of high quality and accessible, including for demographic groups who find it harder to access the service. NHS England (Yorkshire and the Humber) are working closely with the existing providers and InHealth Intelligence Ltd to ensure a smooth transition over the next few months with the new contract term commencing on 1st April 2023 for this locality and population cohort.

Further communications will be shared to all stakeholders and systems in due course by InHealth Intelligence as the mobilisation of the new service commences.

Kind Regards,

Sharon Procter  
Public Health Programme Manager
