

31<sup>st</sup> January 2023

Dear Sir/Madam,

**RE: Diabetic Eye Screening Programmes in West Yorkshire**

I am writing to introduce InHealth Intelligence as the new provider of diabetic eye screening services in West Riding and Craven, and Leeds and Mid Yorkshire from 1<sup>st</sup> April 2023 when the existing contract comes to an end.

Regular eye screening is very important for people with diabetes, and we look forward to working with you to ensure individuals with diabetes receive the highest possible care when they visit our eye screening services.

We will be working to the national guidelines for the delivery of the screening programme with a strong emphasis on grading quality, access and supporting as many people as possible to take up the screening offer as part of their wider diabetes care.

The team at InHealth Intelligence will work in partnership with NHS England & NHS Improvement, GPs and the existing programme provider to put the new service in place.

To keep yourself and the other stakeholders informed with the latest news from the mobilisation, we will be issuing a regular bulletin. Please find this attached. If you would like anyone else to receive this in your organisation, please contact Rayne Corkett at [rayne.corkett@inhealth-intelligence.com](mailto:rayne.corkett@inhealth-intelligence.com)

Yours faithfully,

**Bev Tolley**

**Head of Diabetic Eye Screening Programmes – InHealth Intelligence Ltd**
